About Greenlane Renewables

Greenlane Renewables is a leading global provider of biogas upgrading systems that are helping decarbonize natural gas. Our systems produce clean, low-carbon and carbon-negative renewable natural gas from organic waste sources including landfills, wastewater treatment plants, dairy farms, and food waste, suitable for either injection into the natural gas grid or for direct use as vehicle fuel. Greenlane is the only biogas upgrading company offering the three main technologies: water wash, pressure swing adsorption, and membrane separation. With multiple core technologies, more than 110 biogas upgrading systems in 18 countries and counting, 30+ years of industry experience and patented proprietary technology, Greenlane is inspired by a commitment to helping waste producers improve their environmental impact, green credentials, and bottom line.
